

# Strategic EAI solution

LEADER IN INTEGRATED BUSINESS SOLUTIONS ARCHITECTURE

## DEX Solution

**THE DEX SOFTWARE PACKAGE IS A DATA-SHARING PLATFORM.  
DEX X GIVES YOU INSTANT VISIBILITY OF YOUR IT SYSTEM**

#### **EAI**

With DEX X, you have full standalone control over your exchanges. Your interfaces are standardised, centralised and fully automated.

#### **SIMPLICITY**

Entirely graphic, DEX X enables you to design and maintain your exchanges at low cost (saving of at least 50% compared with a specific development).

#### **COMPREHENSIVENESS**

DEX X enables you to define transformations between multiple data formats simply and intuitively. The data may be extracted or integrated via files, databases, web services, etc.

#### **RELIABILITY & MONITORING**

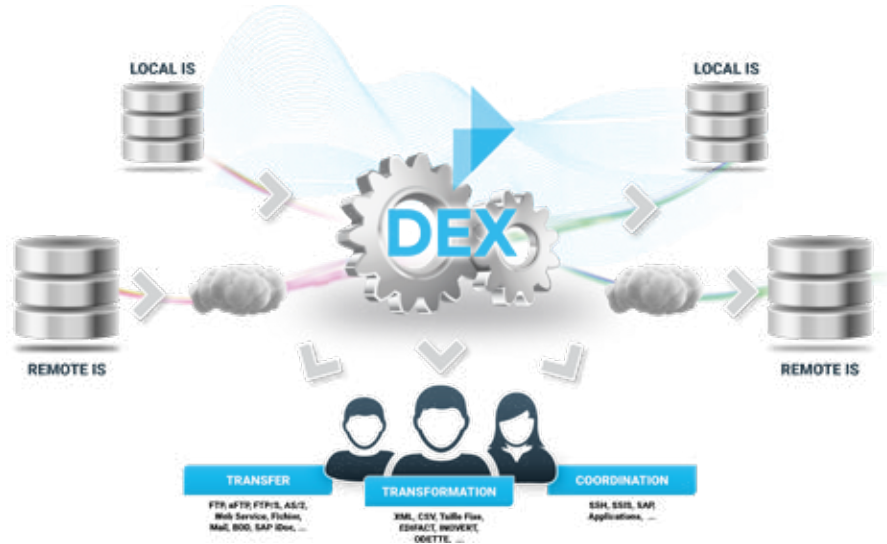

With automated error handling, the comprehensive monitoring functionalities and the reliability of the DEX X execution engine, you achieve interface operating time savings of 80%.

#### **CUSTOMISED ASSISTANCE**

Our training, assistance with startup and documentation enable you to quickly become autonomous in the parameterisation and administration of DEX flows.

## INTERFACES BECOME SIMPLE, UNIFORM AND FULLY MONITORED

With DEX X, you have immediate visibility of your information system and receive alerts only when necessary. Your data will be automatically transferred, transformed and monitored.

### OPTIMISE YOUR IT SYSTEM

Centralised and standardised management of exchanges. Coordination and monitoring of existing interfaces.

### DEVELOP YOUR IT SYSTEM

Facilitated integration of new applications and new partners. Rapid design of new interfaces by parameterisation and coordination.

### CONTROL YOUR EXCHANGES

Coordination and automation of exchanges: built-in scheduler, flow management centralisation, automatic checks and alerts, business supervision, etc.

### CUT YOUR COSTS

Simple and quick to implement and handle, specific elements can be deleted.

### 150 ACTIVE CLIENTS

DEX X meets requirements for integration of applications and the practical concerns that companies encounter day to day: integration of ERP/CRM applications, data feed to Infocentres and synchronisation, integration and data feed to portals, implementation of exchanges with partners, remote collection and remote distribution, publication, implementation of exchanges with partners, remote collection and distribution, publication, automation and monitoring, etc.

#### SaaS SOFTWARE PUBLISHER

ACA has been designing, publishing and marketing a range of software solutions for over 25 years.

It supports over 350 clients of all sizes across all sectors of the economy.
